As part of a wide-ranging effort to raise awareness of the sign industry and in the spirit of co-operation between sign users, legislators and sign manufacturers, the Sign Association of Canada is pleased to present Sign Type Illustrations, a knowledge product designed to address the needs of all three parties concerned.

The Sign Association of Canada produces knowledge products on effective sign strategies, systems, and codes. Our aim is to empower communities by facilitating a dialogue between the sign industry and architects, urban planners, developers, code officials, business owners, and designers to create more navigable cities, thriving businesses, safer public spaces, and strong urban identities.

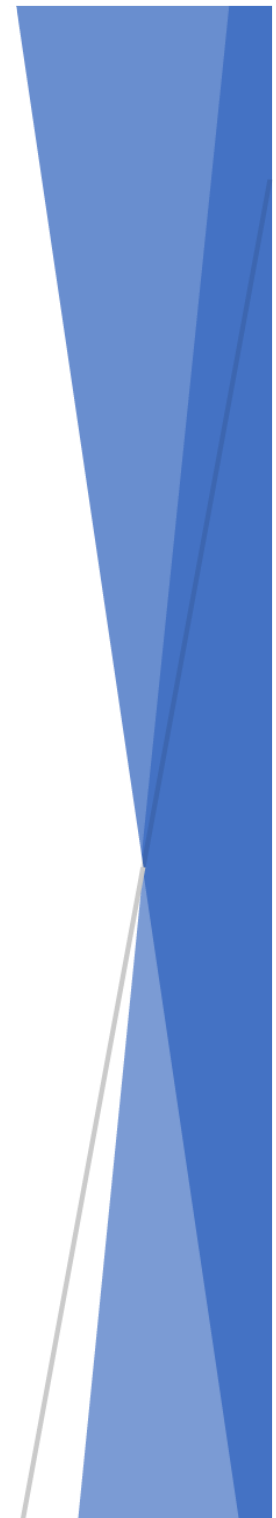

This is a multipurpose document meant to be used by members as an educational tool both for regulators and end users.

The Sign Association of Canada would like to take this time to acknowledge the SAC Government Relations Committee member David Atkinson of Five Star Permits for producing these illustrations.

Table of Contents
